Four Relay Board

We offer our customers an excellent quality range of Four Relay Board. It is the simplest way to activate anything remotely (motor, alarm, display). These are widely used and made as per requirements of our valued clients.

Specifications:

- Power Supply 12 V DC for both remote (generally battery operated) and relay board
- Wireless Relay Board- 4
- Same as Wireless Relay Board-12 except mode selection feature
- Operating mode selection for individual relay
- There are four "U" pins one for each relay. When pin shorts central pin and pin marked "U" – the operation is controlled by micro-controller. When it shorts central pin to pin marked "D", the operation is controlled by decoder– It can be momentary or latching depending on decoder
- With micro controller relays will operate in Toggle mode. If "T" pins are shorted it will be in Latching mode. If "M" pins are shorted it will be in Momentary mode
- We offer our customers an excellent quality range of Four Relay Board. It is the simplest way to activate anything remotely (motor, alarm, display). These are widely used and made as per requirements of our valued clients.
