

Wireless Attendant Calling System

This is a perfect product for hospitals, offices and banks for attendant or nurse calling. On press of CALL button from the patient's room or cabin, the room number is lit up at the central display via wireless link. The RESET button when pressed will switch off the number from the display unit. No wiring is required from each room to the central display attendant control station.

Wall unit for CALL and RESET is available with a hanging cord switch that can be kept near the patient's bed.

FEATURES:

- Power Supply for Central Display: 240V , 50 Hz AC
- Size of each digit: 1.5"
- Wall unit is operated with a power adapter
- Display screen is customizable and can be made for any number of rooms .
